

# JOnAS OpenSource Java EE Application Server - Doc - Migration

[Here are listed some of the differences between JOnAS 5 and JOnAS 4.8 we have to be aware of.](#)

## ***Here are listed some of the differences between JOnAS 5 and JOnAS 4.8 we have to be aware of.***

- Check the [New and Noteworthy](#) for new features of this release.

### Building, structure of JOnAS

- the building process has changed -> Maven is used
- JOnAS has been completely refactored the name of the packages has changed.
- the structure of a JONAS\_ROOT has changed:
  - the old examples has been removed: only JEE 5 examples are kept with one JEE 4 example.

### Functionnalities

- container EJB 3
- new services wm,depmonitor
- Tomcat 6 used
- new deployment policy
- newjb uses new ant tasks for generating a JONAS\_BASE
- service jms don't exist anymore -> use resource service instead

### Configuration

- jonas.properties -> new services: wm,ejb3,ejb2
- server.xml, context.xml, web.xml doesn't exist anymore and replaced by tomcat6-server.xml, tomcat6-context.xml, tomcat6-web.xml
- JONAS\_BASE/deploy new directory for deployment.
